TECHNICAL ARTIST | UNREAL ENGINE 5 | PROCEDURAL TOOLS | REAL-TIME 3D PIPELINES

B.A. candidate in Public Art, concentrating in Urban Space Art and Design, with hands-on work in Unreal Engine 5, Blueprint, procedural environment generation, AI-assisted 3D asset pipelines, and interactive prototyping. Incoming Technical Art Intern at NetEase Games seeking Technical Art opportunities in games, real-time 3D, and virtual production.

EDUCATION

Sichuan Fine Arts Institute
B.A. Candidate in Public Art
Concentration: Urban Space Art and Design

Expected July 2027
Chongqing, China

EXPERIENCE

NetEase Games | Incoming Technical Art Intern

Starting August 2026
China

- Selected for an upcoming Technical Art internship focused on real-time content production and game-development workflows.

SELECTED TECHNICAL PROJECTS

JSON-Driven Procedural Environment Generator for UE5

Unreal Engine 5 | Blueprint | Construction Script | JSON

- Created a Blueprint-based Unreal Engine 5 procedural generation tool that reads structured JSON data to configure room dimensions, wall height, tile size, cabinet count, and light count.
- Automated modular environment updates through the Construction Script, including random prop placement and real-time validation.
- Streamlined rapid scene iteration by reducing repetitive manual layout work.

AI-Assisted 3D Asset Production Pipeline

Unreal Engine 5 | Blender | ComfyUI | Stable Diffusion | Tripo

- Generated concept images with ComfyUI and Stable Diffusion, performed visual analysis, and translated selected concepts into 3D assets with Tripo.
- Refined generated assets in Blender through cleanup, topology and geometry review, and material and thickness evaluation.
- Validated modular environment assets in Unreal Engine 5 to assess production limitations and asset usability in real-time workflows.

AI NPC Interaction Prototype

Unreal Engine 5 | Blueprint | UI | API Integration

- Implemented proximity detection and a Press E interaction in Unreal Engine 5 to open a dialogue UI.
- Integrated text input and message submission with a third-party AI API while maintaining continuous conversation history.
- Added interface-closing controls, disabled player input during dialogue, and restored gameplay controls when the UI closed.

TECHNICAL SKILLS

Game Engine & Real-Time	Unreal Engine 5, Blueprint Visual Scripting, Construction Script, Sequencer, UI Interaction Prototyping, Procedural Scene Generation, Real-Time Lighting
3D & Spatial Tools	Blender, SketchUp, AutoCAD, Modular Asset Design, Environment Design, Architectural Visualization
AI & Pipeline Tools	ComfyUI, Stable Diffusion, Tripo, JSON-Based Workflows, AI API Integration, AI-Assisted Asset Production
Visual & Documentation	Adobe Photoshop, D5 Render, Lumion, CapCut, Technical Documentation, Workflow Diagrams, Presentation Design
